

# The Car of the Future

## Amazing Fact

The first ever Ford car was sold on July 23rd 1903.

The car was a Ford Model A, which had a top speed of 30 miles per hour.

## Challenge

The car owners of 1903 would have found it impossible to imagine that a car would travel at the speeds they do today. Also, they would have been amazed at the features modern day cars have.

What features of future cars do you think would amaze us?

Design a new car below, which would have a release date of 2103.

Include labels, which show clearly:

- the speed the car will travel;
- the material it is made from;
- the interior features;
- the exterior features.

You could also try to find out:

- how much the Model A would have cost;
- which modern production car has the highest top speed;
- how many cars Ford have sold since then;
- which car manufacturer has sold more cars than any other;
- how popular electric cars are now;
- which optional features you can have if you buy a new car today.
